data compression is one of the main contributing factors in the explosive growth in information technology without it a number of consumer and commercial products such as dvd videophone digital camera mp3 video streaming and wireless pcs would have been virtually impossible transforming the data to a frequency or other domain enables even more efficient compression by illustrating this intimate link the transform and data compression handbook serves as a much needed handbook for a wide range of researchers and engineers the authors describe various discrete transforms and their applications in different disciplines they cover techniques such as adaptive quantization

and entropy coding that result in significant reduction in bit rates when applied to the transform coefficients with clear and concise presentations of the ideas and concepts as well as detailed descriptions of the algorithms the authors provide important insight into the applications and their limitations data compression is an essential step towards the efficient storage and transmission of information the transform and data compression handbook provides a wealth of information regarding different discrete transforms and demonstrates their power and practicality in data compression

mainframe computers play a central role in the daily operations of many of the world's largest corporations batch processing is still a fundamental mission critical component of the workloads that run on the mainframe a large portion of the workload on IBM z/OS systems is processed in batch mode this IBM Redbooks publication is the fourth volume in a series of four they address new technologies introduced by IBM to facilitate the use of hybrid batch applications that combine the best aspects of Java and procedural programming languages such as COBOL this volume focuses on the latest enhancements in IBM IMS™ batch support IMS has been available to clients for 45 years as IMS Transaction Manager IMS Database Manager or both the audience for this book includes IT architects and application developers with a focus on batch processing on the z/OS platform
