this book the 15th of 15 related monographs on cubic dynamic systems discusses crossing and product cubic systems with a crossing linear and self quadratic product vector field the author discusses series of singular equilibriums and hyperbolic to hyperbolic scant flows that are

switched through the hyperbolic upper to lower saddles and parabola saddles and circular and hyperbolic upper to lower saddles infinite equilibriums series of simple equilibrium and paralleled hyperbolic flows are also discussed which are switched through inflection source sink and parabola saddle infinite equilibriums nonlinear dynamics and singularity for such crossing and product cubic systems are presented in such cubic systems the appearing bifurcations are parabola saddles hyperbolic to hyperbolic secant flows third order saddles centers and parabola saddles saddle center

this book the 14th of 15 related monographs on cubic dynamical systems discusses crossing and product cubic systems with a self linear and crossing quadratic product vector field dr luo discusses singular equilibrium series with inflection source sink flows that are switched with parabola source sink infinite equilibriums he further describes networks of simple equilibriums with connected hyperbolic flows are obtained which are switched with inflection source sink and parabola saddle infinite equilibriums and nonlinear dynamics and singularity for such crossing and product cubic systems in such cubic systems the appearing bifurcations are double inflection saddles inflection source sink flows parabola saddles saddle center third order parabola saddles third order saddles and centers

this graduate textbook covers topics in statistical theory essential for graduate students preparing for work on a ph d degree in statistics the first chapter provides a quick overview of concepts and results in measure theoretic probability theory that are useful in statistics the second chapter introduces some fundamental concepts in statistical decision theory and inference chapters 3 7 contain detailed studies on some important topics unbiased estimation parametric estimation nonparametric estimation hypothesis testing and confidence sets a large number of exercises in each chapter provide not only practice problems for students but also many additional results in addition to improving the presentation the new edition makes chapter 1 a self contained chapter for probability theory with emphasis in statistics added topics include useful moment inequalities more discussions of moment generating and characteristic functions conditional independence markov chains martingales edgeworth and cornish fisher expansions and proofs to many key theorems such as the dominated convergence theorem monotone convergence theorem uniqueness theorem continuity theorem law of large numbers and central limit theorem a new section in chapter 5 introduces

semiparametric models and a number of new exercises were added to each
chapter

is it possible to multiply 897589798678 x 999999999999 or divide 889576

family and society with 151 mind blowing and lightning speed calculating
math tricks and world s fastest mental calculating techniques the tricks
using in this book are easier and faster sometimes even faster than the
computer often in a matter of seconds this book is fully packed with
fascinating short cuts tips and tricks by using the techniques of vedic
maths and speed math that will make you a mathematical wizard in future
in 151 rapid math tricks become a mathemagician you will learn how to
multiply faster than a calculator how to find square root and cube root
in less than 10 seconds how to solve percentages mentally how to
calculate 3 x 3 digits and 4 x 4 digits multiplication in single line
how to square numbers in seconds how to square numbers up to 100 how to
divide numbers in your mind how to subtract without borrowing etc each
trick elucidates how to calculate problems imminently with examples of
over 500 solved problems in simple language this book is very ideal for
students teachers people from all walks of life and those preparing for
competitive exams like mba mca gre gmat ssc psc banking etc can make use
of it

this bestselling textbook is designed to help students understand
parametric and nonparametric statistical methods so that they can tackle
research problems successfully by working through this book carefully
and systematically those who may not have a strong background in
