it is not the consciousness of men that defines their existence but on the contrary their social existence determines their consciousness karl marx in recent years several researchers have argued that the design of multi agent systems in complex open environments can benefit from social abstractions in order to cope with problems in coordination cooperation and trust among agents problems which are also present in human societies the agent mediated electronic institutions e institutions for short is a new and promising field which focuses in the concepts of norms and institutions in order to provide normative frameworks to restrict or guide the behaviour of software agents the main idea is that the interactions among a group of software agents are ruled by a set of explicit norms expressed in a computational language representation that agents can interpret such norms should not be considered as a negative constraining factor but as an aid that guides the agents choices and reduces the complexity

of the environment making the behaviour of other agents more predictable
