we planned this book as a festschrift for smitty stevens because we thought he might be retiring around 1974 although we knew very well that only death or deep illness would stop smitty from doing science death came suddenly unexpectedly after a full day of skiing atvail colorado on the annual trip with wife didi to the winter conference on brain research smitty liked winter conferences near ski resorts and often tried to get us other psychophysicists to organize one every person is unique smitty would have said it s mainly because each of us has so many genes that two combinations just alike would be well nigh impossible but most of us strive in many ways to be like others and to abide by the norms some smaller number try even harder to be unlike other people as a result many persons seem to lose their uniqueness their individuality not smitty he tried neither to be like others nor to be different he took himself as he found himself and ascribed peculiarities strengths and weaknesses to his pioneering utah forebears in whom he took much pride his was the true and right nonconformity he approached each task each problem ready to grapple with the facts and set them into meaningful order and if the answer he came up with was different from everyone else s well that was too bad

rich in examples and applications to everyday life sensation and perception third edition is a cutting edge and highly readable account of modern sensation and perception from both a cognitive and neurocognitive perspective

this book combines sensation and perception with all biological sensory aspects of perception with all biological sensory aspects of perception covered from an evolutionary point of view it raises the key question how do the senses gather and secure information about the outside world this basic question is addressed by explaining how the physical world interacts with and stimulates the senses and in turn how the sense and the nervous system transform integrate and process the stimulation copyright libri gmbh all rights reserved

ando establishes a theory of subjective preference of the sound field in a concert hall based on preference theory with a model of human auditory brain system the model uses the autocorrelation function and the interaural crosscorrelation function for signals arriving at two ear entrances and considers the specialization of human cerebral hemispheres the theory may be applied to describe primary sensations such as pitch or missing fundamental loudness timbre and duration the theory may also be applied to visual sensations as well as subjective preference of visual environments remarkable findings in activities in both auditory brain and visual brain systems in relation to subjective preference as a primitive response are described

psychophysics visual system brightness and spatial frequency color auditory system hearing taste smell and touch space form constancies speech and music time motion attention development learning and experience individual differences the stroop effect

this book offers an overview of haptic sensation and its influence on consumers behaviour especially in dual and mediated environments where products are accessible through an interface after almost three decades marketers have reached a critical understanding of the importance of consumers senses to the processing of brands products and advertising information since the development of the internet however there have been questions as to how markets and consumers can reach out to products in different environments recent advances in technologies allow sensations to render or stimulate physical sensations similar to the handling of the same product these emerging possibilities question the way consumers are and will be able to feel a product according to the reality it relies on the book begins by defining and discussing haptic consumption before introducing the challenge of appealing to consumers senses in the digital age and examining how marketing managers have overcome this tangible barrier to date the authors go on to further investigate the role of interfaces in rendering tactile sensations with a particular focus on technological innovations finally the book presents the authors original research in the field and offers a prospective vision of consumption for the coming years

infant perception from sensation to cognition volume i basic visual processes focuses on the study and programmatic investigations of infant perception examining early sensory perceptual and cognitive systems this book is divided into five chapters chapter 1 analyzes the major physiological and behavioral techniques used to measure infant vision each technique is critically evaluated in terms of the method employed type of data that can be obtained and anatomy of the visual system the neuronal model to explain developmental changes and techniques used to assess infant visual preferences for patterns varying in amount of contour are discussed in chapter 2 chapter 3 demonstrates the value of the corneal reflection technique for the study of infant attention and visual scanning patterns while chapter 4 examines the developmental changes and individual differences in early pattern perception the last chapter concentrates on the evidence of infant visual preferences for novelty and on the implications of such evidence for models of early recognition memory this publication is a good reference for pediatricians and clinicians concerned with infant perception

a journal of philosophy covering epistemology metaphysics philosophy of language philosophy of logic and philosophy of mind

bruce goldstein's sensation and perception the best seller which has helped over 150 000 students understand the ties between how we sense the world and how the body interprets these senses is now in a brilliant full color seventh edition a key strength of this text has always been the ability to show the student what they are learning through examples and visuals now the book takes this visual learning one step further by using color throughout as a learning tool as the sole author of the text goldstein's singular voice combines with his extensive classroom experience and most innovative research to create a visual text unparalleled in the field the text walks the student through an intriguing journey of the senses with a mixture of clarity and thoroughness the accompanying virtual lab media exercises available both on cd rom within the perception psychologynowtm student tutorial platform and in the online webtutortm advantage product offer a wide array of animations and examples designed to stimulate understanding of difficult concepts every chapter has been updated for currency and readability and a new chapter six on visual attention rounds off this timely revision

provides coverage of all sensory processes from neurophysiology to cognitive perception new features of this third edition include coverage of vision and hearing reorganized around systems functions and pattern perception

the first edition of this comprehensive introduction to sensation and perception has been highly praised for its unique approach it allows students to thoroughly grasp the fundamental principles in relation to the relatively simple sensory systems before moving on to the more complex topics book jacket
