this book presents the latest numerical solutions to initial value problems and boundary value problems described by ordinary differential equations and partial differential equations the primary focus is in numerical solutions to initial value problems ivps and boundary value problems bvps

extensively revised and updated antisense drug technology principles strategies and applications second edition reflects the logarithmic progress made in the past four years of oligonucleotide based therapies and in particular antisense therapeutics and research interpreting lessons learned from the clinical trials of first generati

this book contains a systematic exposition of the facts relating to partial differential equations with constant coefficients the study of systems of equations in general form occupies a central place together with the classical problems of the existence the uniqueness and the regularity of the solutions we also consider the specific problems that arise in connection with overdetermined and underdetermined systems of equations the extendability of the solutions into a wider

region the extendability of regularity in cohomology and so on great attention is paid to the connections and the parallels with the theory of functions of several complex variables the choice of material was dictated by a number of considerations among all the facts relating to general systems of equations the book contains none that relate to the behavior of differential operators in spaces of slowly growing functions missing also are results relating to a single equation in one unknown function the correctness of the Cauchy problem certain theorems on p -convexity and the theory of boundary values are all set forth in other monographs Gel'fand and Silov 3 Hörmander 10 and Trèves 4 the book consists of two parts in the first we set forth the analytic method which forms the basis for the contents of the second part which itself is dedicated to differential equations the first part is preceded by an introduction in which the content and methods of part I are described all the notes and bibliographical references are collected together in a special section
