the term new adult was coined in 2009 by st martin's press when they sought submissions for a contest for fiction similar to ya that can be published and marketed as adult a sort of older ya or new adult however the literary category that later emerged bore less resemblance to young adult fiction and instead became a sub genre of another major popular genre romance this element uses new adult fiction as a case study to explore how genres develop in the twenty first century literary marketplace it traces new adult's evolution through three key stages in order to demonstrate the fluidity that characterises contemporary genres it argues for greater consideration of paratextual factors in studies of genre using a genre worlds approach it contends that in order to productively examine genre we must consider industrial and social factors as well as texts

this book offers to delineate a key phenomenon in contemporary anglophone fiction novel expansion when the plot and characters from a finished novel are retrieved to be developed in new adventures set before after or during the narrative time of the source text if autographic and allographic sequels are almost as old as literature prequels that imagine the anteriority of a narrative and coquels that develop secondary characters in the same story time as the source text are more recent the overall trend for novel expansion spread in the mid 1980s and 1990s and has

since shown no sign of abating this volume is organised following three types of relationships to the source texts even if these occasionally combine to produce a more complex structure this book comprises 11 essays preceded by an introduction that examine narrative strategies aesthetic ethical and political tendencies underlying these novel expansions following the overview provided in the introduction the reader will find case studies of prequels coquels and sequels before a final chapter that encompasses them all and more
