research paper undergraduate from the year 2018 in the subject computer science commercial information technology grade a german university in cairo language english abstract enterprise resource planning erp is a software that consists of a group of applications and tools that aim mainly to monitor business functions operations and processes across an organization providing reliable information to different units of the company such as finance and accounting sales and distribution human resources and others in addition with the daily evolution of information technology the erp system has been progressing and building itself for the last two decades until it took the shape we all know now on the other hand business process management bpm can be identified as the discipline that reaches for the maximum control and management of organizational structure and format of the business processes which eventually leads to enhanced

business process management this research paper is exploring the impact of erp on the effectiveness of business process management by evaluating erp potential development on business processes and how automation provided by erp would affect these processes in addition this study aims to demonstrate the functionalities of erp and their possible positive effect the system may have on business performance even though some studies argue that not all erp implementation project succeed the paper is organized as follows the first section will discuss erp s definition evolution and history functionalities the implementation stages of erp systems benefits of erp and the cloud erp and its types the second section will discuss the definition of business processes management in addition the bpm methodologies including business process architecture how to make the right choice for methodology and process classification framework the last section will discuss and explore how investing in erp can improve bpm by explaining the budget time and plan needed for erp systems and business processes re engineering and system integration to match with the erp systems also this section includes benefits and risks of erp on bpm by evaluating erp effectiveness and efficiency and assessing risks

international conference on contemporary trends in multidisciplinary research innovation icctmri 2023 was conducted by birla institute of technology mesra ranchi off campus jaipur rajasthan india icctmri 2023 provided a unique opportunity to interact with researchers academicians scientists and specialists in the various research and development fields of biotechnology and bioengineering management animation science and technology across the globe icctmri 2023 offered a platform for global experts to gather and interact intensively on the topics of animation biotechnology computer science electronics engineering electrical engineering environmental engineering management practices and multimedia and sciences

this book is designed for use as both a reference guide and a conceptual resource for professionals working with and around sap erp this material approaches real world sap topics using an integrated process perspective of the firm each process is discussed within the context of its execution across functional areas in the company professionals will gain a deep appreciation for the role of sap erp systems in efficiently managing processes from multiple functional perspectives

enterprise process management systems engineering process centric enterprise systems using bpmn 2 0 proposes a process centric paradigm to replace the traditional data centric paradigm for enterprise systems es es should be reengineered from the present data centric enterprise architecture to process centric process architecture to be called as enterprise process management systems epms the real significance of business processes can be understood in the context of current heightened priority on digital transformation or digitalization of enterprises conceiving the roadmap to realize a digitalized enterprise via the business model innovation becomes amenable only from the process centric view of the enterprise this pragmatic book introduces enterprise process management systems epms solutions that enable an agile enterprise describes distributed systems and service oriented architecture soa that paved the road to epms leverages soa to explain the cloud based realization of business processes in terms of services describes how bpmn 2 0 addresses the requirements for agility

by ensuring a seamless methodological path from process requirements modeling to execution and back to enable process improvements presents the spreadsheet driven spreadsheeter application development sad methodology for the design and development of process centric application systems describes process improvement programs ranging right from disruptive programs like bpr to continuous improvement programs like lean six sigma and toc enterprise process management systems engineering process centric enterprise systems using bpmn 2 0 describes how bpmn 2 0 can not only capture business requirements but it can also provide the backbone of the actual solution implementation thus the same diagram prepared by the business analyst to describe the business s desired to be process can also be used to automate the execution of that process on a modern process engine

this book is about running modern industrial enterprises with the help of information systems enterprise resource planning erp is the core of business information processing an erp system is the backbone of most companies information systems landscape all major business processes are handled with the help of this system supply chain management scm looks beyond the individual company taking into account that enterprises are increasingly concentrating on their core competencies leaving other activities to suppliers with the growing dependency on the partners effective supply chains have become as important for a company s success as efficient in house processes this book covers typical business processes and shows how these processes are implemented examples are presented using the leading systems on the market sap erp and sap scm in this way the reader can understand how business processes are actually carried out in the real world

erp the dynamics of supply chain and process management is a complete updating and expansion of avraham shtub s award winning 1999 text enterprise resource planning erp the dynamics of operations management new chapters written together with his co author reuven karni cover enterprise process modeling design of business processes a complete revision of the original chapter on the integrated order fulfillment process using erp business process management business process improvement and a new appendix on simulating process life cycles using serious games as teaching aids merptm is designed to facilitate the teaching of integrated operations of a business organization with a focus on corporate performance management it reflects a fully live environment and allows students to participate in a virtual organization made real and dynamic as minute by minute business events and conditions unfold this book is ideal for use in academic and executive programs aimed at teaching students how integrated systems work it is suitable as a textbook for the basic mba operations management course or as a text for courses on erp systems and the development of business processes in an industrial engineering program it could serve to give students their first and perhaps only introduction to business issues like market demand and supplier relationships i used avy shtub s award winning 1999 book on erp and the accompanying operations trainer software in several leading mba programs in the united states and europe most of the courses were delivered in traditional classroom settings but some of them were offered fully online the current revision and second edition of the book co written with reuven karni adds new materials with an emphasis on services and business processes provides excellent detailed examples and revises old ones

of the previous edition the book is nicely complemented and enhanced by the addition of a unique dynamic online simulation package merptm that represents a major upgrade to the old pc based operations trainer in my reading the book s first main theme integrated production and order management ipom is a different and perhaps more valid take on the many issues associated with supply chain management the authors touch on all facets and issues of operations and supply chain management and provide a theory based and sound practice proven approach to the problems present in any organization the second main theme covers the design and improvement of enterprise and business processes touching on facets and issues relating to process based enterprise management i would highly recommend the book and the accompanying software to any instructor teaching operations supply chain management business process management or industrial engineering gyula vastag corvinus university of budapest hungary

selected peer reviewed papers from the international conference on manufacturing science and engineering icmse 2011 9 11 april 2011 guilin china

is your company getting the most from its investment in change many companies have already invested heavily in infrastructure change some are making that investment now and all are contemplating the costs of becoming or evolving as an e business is your company a greenfield organization with no back end systems or one whose infrastructure support systems are integrated across the enterprise are you just beginning to think about e business capabilities or are you on the leading edge of convergence whatever your company s position on the erp e business matrix e business and erp transforming the enterprise provides the proven techniques you need to know to meld enterprise resource planning capabilities with the communications power of the internet is your company positioned for e business success the internet has revolutionized twenty first century business organizations today can communicate with customers suppliers and sellers at e speed with the click of a mouse yet with all of the excitement about the external possibilities of the internet companies still need efficient internal processes to make and move products manage finances recruit and motivate employees and excel e business and erp transforming the enterprise covers the skills and tools you will need to combine existing erp software and capabilities with emerging based technologies in this forward thinking outline for a new business structure executives and managers will discover strategies for established companies to penetrate the internet marketplace procedures that lower costs across the supply and demand chain techniques that help you meet and master the dot com challenge the companies best positioned to succeed in the near future are those that can balance existing erp based infrastructures and capabilities with exciting new e business innovations e business and erp transforming the enterprise examines the changing but essential role of erp places it in the context of the based technologies defining today s e business environment and reveals how to blend the best aspects of both to create a strong and flexible twenty first century business enterprise

this book explains how to embed artificial intelligence in digitized business processes of erp software by solving the two related substantial challenges how can artificial intelligence be systematically integrated into erp business processes for ease of consumption and how can artificial intelligence be made enterprise

ready by covering erp qualities like compliance lifecycle management extensibility or scalability as a general introduction the first part of this book takes the reader through a historical journey towards intelligent erp systems in addition reference processes and a reference architecture for erp systems are proposed which build the foundation for the suggested subsequent solution concept including a method for operationalizing intelligence for erp business processes subsequently in the second part detailed concepts of embedding artificial intelligence into erp software are proposed in this context the suggested solution architecture is depicted and specific topics are resolved like data integration model validation explainability data protection and privacy model degradation and performance in the last part an implementation framework is suggested which enables the previously introduced concepts and harmonizes the development and operations of artificial intelligent erp applications this part concludes with case studies considering artificial intelligence scenarios of sap s 4hana in the areas of logistics finance and sales which apply the defined solution approach and shows its real world feasibility this book is written for professionals who want to implement as developers or exploit as business analysts or consultants or consider plan the implementation exploitation as managers of artificial intelligence in business information systems
