every five years the permanent international committee of linguists cipl organises a world

Congress for Linguists and every five years the committee faces the challenge of presenting a programme at the highest possible level. The CILIP executive committee decided for the congress planned for 2003 in Prague to focus on four major topics which play an important role in today's linguistic debate: 1 typology 2 endangered languages 3 methodology and linguistics including fieldwork and 4 language and the mind. Leading experts have introduced the four themes in their plenary lectures in the course of the congress which served as a basis for the articles presented in the current volume. This book should be a welcome tool for all linguists wishing to find their way quickly in current developments. A CD-ROM containing the full proceedings of the Prague Congress is included.

Professor Lyle Campbell has had a long and distinguished career and his extensive work on the languages of Mesoamerica have inspired research and researchers in this volume. Contributors come together to present new data, analyses and theoretical perspectives on how understanding language change raises questions for language documentation, description and even revitalization. Coverage ranges from the linguistic isolates Basque and Mapundungun to large families such as Tupian and Austronesian and spans a range of theoretical issues including ongoing language change, etymological opacity, word order, alignment systems and grammatical relations, language contact, onomastics and the study of pre-history. The book shows that linguistic fieldwork when carried out and used appropriately allows for a more consistent understanding of language change and for a better understanding of the ethnographic record. It also explores the junctures between language change, linguistic diversity and other related fields that draw on primary linguistic fieldwork.

Native American languages are spoken from Siberia to Greenland and from the Arctic to Tierra del Fuego. They include the southernmost language of the world, Yaghan, and some of the northernmost Eskimoan. Campbell's project is to take stock of what is currently known about the history of Native American languages and in the process examine the state of American Indian historical linguistics and the success and failure of its various methodologies. There is remarkably little consensus in the field, largely due to the 1987 publication of *Language in the Americas* by Joseph Greenberg. He claimed to trace a historical relation between all American Indian languages of North and South America, implying that most of the Western Hemisphere was settled by a single wave of immigration from Asia. This has caused intense controversy and Campbell, as a leading scholar in the field, intends this volume to be in part a response to Greenberg. Finally, Campbell demonstrates that the historical study of Native American languages has always relied on up-to-date methodology and theoretical assumptions and did not, as is often believed, lag behind the European historical linguistic tradition.
