Russia's surprising return to the world stage since 2000 has aroused the curiosity if not the fear of the West. Gradually the Kremlin went from a policy of deference to foreign powers to acting with independence. The driver of this transformation was President Vladimir Putin, who with skillful caution navigated Russia back into the ranks of global powers in theaters of conflict such as Georgia, Syria, and Ukraine. The Kremlin won significant victories at little cost to consolidate its decisive position. Following a chronological approach from the fall of the Soviet Union to the present, this book draws on new documents to describe how Russia regained its former global prominence. Clear accounts of key decisions and foreign policy events, many presented for the first time, provide important insights into the major confrontations with the West.

The transition from the Soviet to the post-1991 Russian military is a fascinating story of decline and reinvention. The Soviet Army suffered a slow demise, dissolving in 2000 and only gradually reforming based on radically different principles. The first Chechnya War (1994-1996) was the lowest point for the Soviet military, but the second Chechnya War (1999-2004) saw the initial stirrings of the new Russian Army. The five-day war with Georgia in August 2008 was its first major success and marked Russia's return to world power status. Lively accounts and maps describe the actions of these wars along with the Crimea operation of 2014, the separatist struggles in Eastern Ukraine, and the ongoing Russian intervention in Syria.
