this book has done all the homework for you and provides a succinct accessible overview on the training and tools available for process improvement that fills that gap of being not too rigid nor too blasé too few standard procedures within an organization and inefficiency will inevitably ensue but too many and creativity is stifled this catch 22 is enough to make heads spin how does one settle

on the perfect mix that will streamline activities and create smooth workflows in successful business process management you will discover step by step instructions that explain how to overcome resistance and apathy to standard procedures take a systematic rather than ad hoc approach to process management design key processes and capture them in documented procedures revise existing processes when feasible roll out the changes so people know what to do embed them in the organization for reliable outcomes with the increasingly complex organizations of the twenty first century it is vital that companies have standard documented processes and procedures in order to achieve high levels of quality and productivity yet they can't afford to dampen the innovation that got them on the map in the first place successful business process management will show you how to get it just right

end profit and loss account as a result there will be a stage at which the parties have developed relations and prospects of gain while there are still a number of problems that are difficult to solve and that fail to evoke consensus each party will then draw up a profit and loss account on the positive side of the balance are the relations developed and the gains collected on the negative side there are the losses and the unsolved problems for particular parties who have no interest in the problem the latter side is uninteresting for others who have an interest in a particular solution of this problem it represents a form of loss profit and loss balance positive for a critical mass speed the speed of the process will increase if the profit and loss account shows a positive balance for a critical mass of parties they wish to collect their gains and therefore to make final decisions at this point there will be an important psychological mechanism parties tend to anticipate on collecting their gains which increases their urge to speed up the process it is clear from the above however that the end of a process is difficult to predict
